

“ The new Bona FlexiSand Power Drive is one of the most productive, labor saving, and cost efficient hardwood floor sanding systems I have ever used! It saves a pass with the belt sander and edger and decreases orbital sanding by 75% on a job. In total it saves us an entire day of sanding per job. ”

- Gary Sword, Sword Floors

Passion for Wood Floors

Established in 1919, Bona is a world leading innovator with a unique system for hardwood floor treatment. Through subsidiaries and distributors we have local presence in more than 50 different countries enabling us to be close to our customers and craftsmen.

Our long commitment and passion for hardwood floors enable us to offer lasting, sustainable results that meet all hardwood floor needs for professionals and floor owners alike.

Bona[®] FlexiSand Power Drive[™]

Powerful direction-free sanding

Bona[®]

Powering Up the Bona FlexiSand Power Drive™

Introducing the latest breakthrough in Bona's machine lineup, the Bona FlexiSand Power Drive, the world's first in direction-free sanding. This truly all-directional and versatile disc sanding system delivers exceptional power and can also cut your edging time significantly.

- Can be used to sand entire floor from the start or follow after one cut with a belt machine.
- Achieves the flattest floor with the best scratch pattern for stained or natural floors.
- Saves labor and reduces edging by 50-80%.

A Breakthrough in Sanding

Direction-free sanding

Geared for full power

Effective and easy to operate, the Bona FlexiSand Power Drive transforms hardwood floor sanding into a smooth, simple and manageable process.

Bona® FlexiSand Power Drive™: The Future of Sanding

Easy to Operate

Direction-free operation allows the machine to be handled with ease, even in narrow spaces. The rotating discs eliminate the risk of drum marks on the hardwood floor and ensure a perfectly flat and smooth surface.

Minimizes edge sanding

The unique system design allows sanding movement exceptionally close to walls. It leaves only about 1" - 2" of surface width that requires manual edge sanding...saving time, labor and money. Use the Bona Dual Edge to complete the edging process in record time.

Cog System for Increased Power

The Bona FlexiSand Power Drive's innovative cog system, with its rotating geared-disc arrangement, delivers significantly more power to the sanding discs for effective bare wood sanding and removal of coatings and stains.

Designed for easy handling and transport

With large wheels and a compact design, the Bona FlexiSand Power Drive can be easily moved between rooms and carried on stairs.

Direction-free sanding for optimum smoothness.

Works closer to walls and minimizes edge sanding.

Dynamic cog system for sanding power.

Large wheels for easy transport.

Optimal Abrasives

Bona GREEN Ceramic Abrasives

- Aggressive - Medium sanding
- Ideal for removing old stain/finish
- Available grits: 36, 40, 50, 60, 80, 100, 120
