Bona®

Direction-free sanding

Geared for full power

Powering Up the Bona **Power Drive**®

The Bona Power Drive® is a truly all-directional and versatile disc sanding system that delivers powerful rotary sanding down to bare wood and significantly reduces your edging time. It delivers an amazingly fine and smooth sanding result and minimizes the risk of drum marks or chatter.

- Ability to utilize throughout the entire sanding process, or follow after initial cut with the Bona Belt® machine
- Achieves the flattest floor with a uniform scratch pattern, wall to wall
- Saves labor time and cost by reducing edging time up to 50-80%
- New 270° LED light improves visibility
- New Multimeter displays voltage, Hz and running hours
- New integrated kickstand enables backward tilting for easier abrasive and accessory changes. This design minimizes stress on the drive plate, extending its lifespan by preventing pivoting on the sanding pads.
- Extra weights now included allowing you to customize cutting power and sanding aggressiveness
- Atomic DCS® compatible

Bona Power Drive®: Empowered Sanding

Easy to operate

Direction-free operation allows the machine to be handled with ease, even in narrow spaces. The rotating discs eliminate the risk of drum marks on the hardwood floor and ensure a perfectly flat and smooth surface.

Minimizes edge sanding

The unique system design allows sanding movement exceptionally close to walls. It leaves only about 1" - 2" of surface width that requires manual edge sanding... saving time, labor and money. Use the Bona CombiEdge to complete the edging process in record time.

Cog system for increased power

The Bona Power Drive's innovative cog system, with its rotating geared-disc arrangement, delivers significantly more power to the sanding discs for effective bare wood sanding and removal of coatings and stains.

Designed for easy handling and transport

With large wheels and a compact design, the Bona Power Drive can be easily moved between rooms and up and down stairs.

Direction-free sanding for optimum smoothness.

Works closer to walls and minimizes edge sanding.

Dynamic cog system for sanding power.

Large wheels for easy transport.

NEXT LEVEL SANDING EXPERIENCE

KICKSTAND

The new kickstand with wheels protects both the floor surface and the Bona Power Drive by removing the repeating pressure on the sanding discs. When tilted, it allows for handling the machine safely and easily during abrasive and sanding plate changes.

270° LIGHT

The new LED light is clear, leaving no shadow from the machine while dispersing light evenly around for perfect floor visibility.

MULTIMETER

The redesigned multimeter displays the voltage coming out of the power supply as well as the main frequency in Hz and the running hours of the machine.

WEIGHTS

Two easy-to-mount 15 lb. weights, provides extra pressure to the Bona Power Drive®, making light work of tough sanding jobs as it allows you to customize the cutting power and sanding aggressiveness of the machine.

Bona Power Drive® Accessories

Bona® Steel Plates

The Bona Steel Plates are designed to offer a true hard-plating option during the sanding process, combining the traditional hard-plating technique with newer multi-directional sanding. Specifically created for contractors who rely on the flattest possible sanding systems for their customers, they help remove chatter and prevent dish-out on any surface.

- Complements the Wire Brush system and reduces the chance of any dish-out on final sanding
- Essential for creating the flattest floor possible
- More aggressive and efficient sanding
- Great for removing chatter using either the Bona Power Drive or Bona MultiDisc
- Available in 4 x 6" or 6 x 5" with Hook and Loop

Bona® Diamond Sanding Plates

The Bona® Diamond Sanding Plates are 6" Hook & Loop diamond segments designed for the Bona Power Drive® to quickly and efficiently sand off stubborn factory-finished UV-cured, aluminum oxide hardwood flooring. In addition, the Bona Diamond Sanding Plates can remove rigid materials on the wood surface, such as adhesive residue or old foam backing from carpets. The long life and sustained removal rate, driven effortlessly by the Bona Power Drive, makes this a must-have tool to save you time, money and labor on your next job. .

- Minimal clogging
- Clean, acceptable profile/minimal soft grain tearing
- Save on time, labor and abrasives

Bona® Wire Brush Technology

The Bona Wire Brushes, when used with the Bona Power Drive®, remove the soft grain, leaving the more durable hard grain, which provides a natural texture and look to the floor. The durable, easy-to-use wire brushes can be used on both newly installed and refinished floors, allowing for close proximity to the walls to minimize edge work and blending issues.

- ✓ 2-dimensional effects
- ✓ Creating texture
- ✓ Achieve a unique look

Wire Brush

The Bona Wire Brush gets down into the grain to create texture and unique color dimensions.

Tynex Brush

A complement to the Bona Wire Brush, Tynex brushes work with a softer action, making them ideal for use after wire-brushing to create smoother, rounder edges, and a more premium look.

Bona Wire Brush System Sanding Sequence

Example process for wire-brushing a floor using a full Bona Sanding System:

*When a softer brushing effect is desired, use the Tynex Brush *after* wire-brushing.

Bringing out the best in hardwood floors.
